

400 and Rising

An Invitation

The Southborough Green Technology and Recycling Committee invites you to an informal gathering of Southborough residents concerned with the continued increase of greenhouse gas levels in the atmosphere and the potential impact to global warming, climate change and economic stability.

Meet other residents in the community with similar concerns. The goal is to form a network of individuals and organizations in Southborough who are concerned about the issues of greenhouse gas emissions.

Carl Guyer, Chairman of the Southborough Green Technology and Recycling Committee, will make a short presentation summarizing recent data on greenhouse gas emissions and associated environmental impact.

Date

Tuesday, September 17, 2013 from 7:00 to 8:30 PM

Location

**Southborough Public Library
25 Main Street
Southborough, MA**

400 parts per million is the current level of Carbon Dioxide (CO₂) in the atmosphere. Pre-Industrial Revolution levels were near 250 parts per million. Recent measurements indicate CO₂ levels are rising at 2 parts per million per year.
