District/multiple schools	1	2	2	2	0	0	0	0
TOTAL	17	187	60	1114	4	30	0	5

What is a possible in-school transmission? A possible in-school transmission is when an individual is identified as a close contact in school and subsequently tests positive. It is labeled as potential transmission because sometimes, in addition to the exposure at school, these individuals may also have had additional recent exposures outside of school.

What is probable in-school transmission? A probable in-school transmission is when an individual is identified as a close contact in school and subsequently tests positive and they had no other known exposure outside of school.

What happens when there is an in-school transmission? The Medical Advisory Team meets to review the data associated with the case, evaluates the mitigation strategies that are being employed and advises on next steps. Some of the things we evaluate are: the activities happening, air quality, distancing and masking in the areas where transmission may have happened.

Year to Date positive tests

VACCINATION RATES

(as of 11/10/21)

ARHS	ENROLLMENT as of 10/1/21	# VACCINATED 11/10/21	% FULLY VACCINATED
	1270	1118	88.03%
9	297	254	85.52%
10	316	272	86.08%
11	317	285	89.91%
12+	340	307	90.29%
MMS	ENROLLMENT as of 10/1/21	# VACCINATED 11/10/21	% FULLY VACCINATED
	529	281	53.12%
6	192	23	11.98%
7	175	126	72.00%
8	162	132	81.48%
TMS	ENROLLMENT as of 10/1/21	# VACCINATED 11/10/21	% FULLY VACCINATED
	386	239	61.92%
6	128	21	16.41%
7	129	105	81.40%
8	129	113	87.60%

Why are these numbers different from the [state vaccination numbers](#)?

The district uses information about vaccine rates from MIIS, parent provided proof of vaccination and immunization records from primary care providers. The population data the state uses for their calculations are not from the most recent census. Additionally, not all of the individuals in each age category identified by the state attend the Public Schools of Northborough and Southborough.

SCREENING AND TESTING

(provided by District)

November 4 - November 10, 2021

COVID Safety Checks*		Test and Stay tests**		Symptomatic tests**	
THIS WEEK	YTD	THIS WEEK	YTD	THIS WEEK	YTD
1945	9764	228	2217	17	159
Positive COVID Safety Checks*		Positive Test and Stay**		Positive Symptomatic**	
THIS WEEK	YTD	THIS WEEK	YTD	THIS WEEK	YTD
1	30	2	15	0	11

*Pooled Screening - PCR test for asymptomatic individuals

**Rapid Antigen test for in-school close contacts and in-school symptom onset

STATE DATA

STATE WEEKLY PUBLIC HEALTH INTERACTIVE DASHBOARD

Data can be found at this [link](#). Choose Interactive Dashboard, City and Town Data and the Weekly Status Map.

City/Town	Total Case Count	Case Count (Last 14 Days)	Average Daily Incidence Rate per 100,000 (Last 14 days)	Relative Change in Case Counts	Total Tests (Last 14 days)	Percent Positivity (Last 14 days)	Change in Percent Positivity
Northborough	1508	24	12.6	Lower	1844	1.46%	Lower
Southborough	676	35	25.9	Higher	2065	1.69%	Higher

Please note: Data for this table is based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.
