Hello Members of the Selectboard,

I am writing in support of reappointing Freddie Casey Gillespie to the Open Space Preservation Commission as well as the Stewardship Committee. Freddie is a valuable member of our community and one of the best organizers I have ever had the pleasure of working under. Because of her winter sowing programs and garden tours, my outlook on gardening has completely changed for the better, now focusing on gorgeous native plants in my yard that hosts multiple pollinators of all species. Freddie's advocacy makes Southborough a better place and her leadership empowers the rest of us to spread the word about conservation and native plants, something Massachusetts needs desperately.

Freddie is an incredible asset to this town and the surrounding communities. I hope she will be reappointed to her roles in our local government and continue to make Southborough the local driver of native plants and conservation.

Thank you very much.
